

Potential environmental effects of CO₂ leakage in the marine and terrestrial environment: Understanding, monitoring, mitigation workshop

Date: 21st Feb 2012 | Venue: Sir Colin Campbell Building, Nottingham University | Time: 9am-5.00pm

The aims of this workshop are to:

- Identify the **current state of R&D** concerning potential CO₂ leakage in the marine and terrestrial environment;
- Identify the **issues and gaps in current research**;
- Identify **what needs to be done** to address these gaps;
- Produce a **report to highlight** some **areas of research that may require further investigation** before CCS is deployed commercially.

How to Register

Registration for this event is free using the link below
